Professional Summary

AI & ML engineering graduate (VTU, 2026) with hands-on, end-to-end experience across the machine learning lifecycle: data collection and preprocessing, model architecture design, training and evaluation, and production deployment on both mobile and cloud platforms. Specialized in Computer Vision (CNN architectures, image classification, real-time inference), Generative AI application development (prompt engineering, LLM-backed chat experiences using the Gemini API), and enterprise conversational AI using Salesforce Einstein AI Agents. Author of a peer-reviewed CNN research paper achieving 93% classification accuracy (IJSREM, Impact Factor 8.659, Crossref-indexed). Completed a 6-month Android development internship at MindMatrix rated *Excellent*, where AI-driven automation reduced manual reporting and data-entry workload by nearly 40%. Recognized Salesforce Trailhead Champion with multiple superbadges in Flow Automation and Platform Fundamentals. Strong foundation in MVVM architecture, offline-first application design, and on-device ML inference optimized for sub-200ms latency. Seeking to apply applied ML engineering skills and a research-driven mindset to a full-time role building intelligent, scalable, production-grade AI systems.

Core Competencies

- End-to-end Machine Learning pipeline design: data ingestion, augmentation, training, validation, deployment
- Convolutional Neural Network (CNN) architecture design, hyperparameter tuning, and model evaluation (accuracy, F1-score, confusion matrix analysis)
- Generative AI application development and prompt engineering for natural-language interfaces
- Conversational AI / chatbot design using enterprise low-code platforms (Salesforce Einstein)
- Native Android application development with MVVM architecture and Jetpack components
- On-device machine learning inference optimization (TensorFlow Lite, quantization, latency reduction)
- Offline-first application architecture with cloud sync (Firebase Firestore, Auth, Storage)
- Cross-functional collaboration, technical documentation, and research writing

Technical Skills

Languages	Python, Kotlin, Apex, HTML, CSS, SQL
Machine Learning	TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, NumPy, Pandas, CNN Architectures, Transfer Learning
GenAI & Conversational AI	Gemini API, Salesforce Einstein AI Agents, Chatbot Design, Prompt Engineering, LLM Integration
Android Development	Android Studio, Kotlin, TensorFlow Lite, ML Kit, MVVM, Jetpack, Coroutines
Cloud & Platforms	Google Cloud (Vertex AI), Firebase (Firestore, Auth, Storage), Salesforce (Trailhead, Flow), MongoDB
Tools & Workflow Concepts	Git, GitHub, Figma, VS Code, Jupyter Notebook, Google Colab, Postman Data Structures & Algorithms, OOP, REST APIs, Agile/Scrum, MVVM, CI basics
Soft Skills	Technical writing, research documentation, cross-team communication, time management

Work Experience

Android App Development Intern

Aug 2025 – Jan 2026

MindMatrix, Bengaluru, Karnataka Performance Rating: *Excellent*

- Designed and built an Android KPI tracking application integrating CNN-based trend analysis, reducing manual reporting effort for the operations team by approximately 40%.

- Implemented five distinct AI-powered features using Kotlin and the Gemini API, including automated summarization and natural-language data queries, cutting manual data-entry time by nearly 40%.
- Designed and deployed Salesforce Einstein AI agents and chatbots via Trailhead to automate internal Q&A workflows for support teams, earning the Trailhead Champion recognition along with multiple superbadges in Flow Automation and Platform Fundamentals.
- Architected an offline-first Firebase backend (Firestore, Authentication, Cloud Storage) with automatic background sync, achieving zero data loss across intermittent-connectivity field conditions.
- Converted and deployed a trained TensorFlow model to TensorFlow Lite for on-device inference, tuning the model for sub-200ms latency on mid-range Android hardware.
- Collaborated with senior engineers in daily stand-ups and sprint reviews, contributing to code reviews and documentation under an Agile development process.
- Presented internship project outcomes to engineering leadership, receiving an "Excellent" performance rating for both technical delivery and communication.

Projects

CNN Plant Species Identification System *Mar 2025 – May 2026 TensorFlow, Keras, OpenCV, NumPy*

- Designed and trained a custom convolutional neural network image classifier on a curated dataset of 10,000+ plant images spanning multiple species and growth stages.
- Applied data augmentation (rotation, flipping, brightness/contrast jitter) and transfer-learning techniques to improve generalization, achieving 93% classification accuracy and a 92% F1-score on the held-out test set.
- Conducted systematic hyperparameter tuning (learning rate, batch size, dropout) and evaluated performance using confusion matrices and per-class precision/recall.
- Co-authored and published the methodology and results as a peer-reviewed paper in IJSREM, Volume 10, Issue 5 (2026), Impact Factor 8.659, Crossref Indexed.

GenAI-Powered Android Application *Aug 2024 – Present Kotlin, Gemini API, Firebase, MVVM*

- Built a full native Android application using MVVM architecture, integrating the Gemini API to power natural-language question-answering and personalized recommendations.
- Designed a bilingual Kannada/English user interface to improve accessibility for rural and regional users, including offline-first support for low-connectivity environments.
- Implemented local caching and background sync logic to ensure a consistent user experience regardless of network availability.

Virtual Mouse Using Eye-Tracking *Mar 2025 – Jun 2025 Python, OpenCV, WebGazer.js*

- Developed a hands-free, webcam-based cursor control system using real-time eye-tracking, enabling accessible computer interaction for users with limited hand mobility.
- Optimized the gaze-estimation and cursor-mapping pipeline to achieve end-to-end latency under 100ms.
- Implemented calibration routines to improve tracking accuracy across different lighting conditions and user positions.

Education

B.E., Artificial Intelligence & Machine Learning *2022 – 2026* *Rajeev Institute of Technology, VTU Belagavi, Karnataka CGPA: 7.8 / 10.0*

- Relevant coursework: Machine Learning, Deep Learning, Computer Vision, Data Structures & Algorithms, Database Management Systems, Cloud Computing, Natural Language Processing, Software Engineering.
- Final-year capstone project: CNN-based Plant Species Identification System, later published in a peer-reviewed journal.
- Active participant in departmental AI/ML workshops, hackathons, and technical paper presentations.

Publications

Lohith D K, Divyashree K N, Khushi B L, Monish H P, Sanjeeva Kumar M D, "*Plant Species Identification Using Convolutional Neural Networks*," IJSREM, Vol. 10, Issue 5, May 2026, ISSN 2582-3930, DOI: [10.55041/IJS-REM63163](https://doi.org/10.55041/IJS-REM63163).

- Co-developed the full research methodology, including dataset curation, CNN architecture design, and experimental evaluation.
- Contributed to manuscript writing, results analysis, and the peer-review revision process prior to publication.

Certifications & Achievements

- Salesforce Trailhead Champion – Einstein AI, Flow Automation, Platform Fundamentals (2026)
- Internet of Things (IoT) – NPTEL, IIT Initiative (2025)
- Git & GitHub – PrepInsta (2025)
- Artificial Intelligence Fundamentals – PrepInsta (2025)
- Rated "Excellent" performance during 6-month industry internship at MindMatrix (2025–2026)
- Published peer-reviewed research in an internationally indexed journal prior to graduation

Extracurricular & Leadership

- Actively participated in college-level AI/ML hackathons and technical symposiums, collaborating with cross-disciplinary teams under time-bound constraints.
- Mentored junior students informally on Python programming fundamentals and introductory machine learning concepts.
- Contributed to open-source repositories and maintained personal GitHub projects documenting ML experiments and Android builds.
- Volunteered in departmental technical events, assisting with logistics and technical demonstrations for AI/ML workshops.

Additional Information

- **Languages Spoken:** English (Professional Proficiency), Kannada (Native), Hindi (Conversational)
- **Interests:** Applied AI research, open-source contribution, accessibility-focused technology, competitive coding, technical writing
- **Availability:** Immediately available; open to relocation and remote/hybrid roles
- **Work Authorization:** Eligible to work in India; open to sponsorship discussions for international opportunities
- **References:** Available upon request
